Course Overview

Our decorative concrete seminar and certification program is tailored for the concrete professional looking for hands-on training and market information that will diversify their current concrete offerings. Two full days of application instruction mixed with business essential topics including costing, pricing, and promotion will provide the tools necessary for individuals or companies interested in entering the decorative concrete market. Attendees will be enlightened to the growth potential of this lucrative market. Contractors already offering decorative options will learn additional techniques and methods to improve their finished product and their companies' bottom line. Space for this hands-on training is limited, so make sure to register TODAY!
